Explanations

Part-A-General Intelligence and Reasoning

Q.2 · Answer (D) Hemisphere

A triangle is a two-dimensional (2D) shape and a hemisphere a three-dimensional (3D) one. A square and a rectangle are 2D shapes, and 'figure' names no particular shape.

Q.3 · Answer (B) ÷ and ×

After interchanging ÷ and ×: 63 × 3 ÷ 21 − 15 + 12 = 9 − 15 + 12 = 6.

Q.4 · Answer (A) Q

R, N, O, P and Q sit in that order from left to right. With five people to M's right, M is at the left end: M, R, N, O, P, Q, so Q is at the extreme right.

Q.5 · Answer (C) Only conclusion 1 follows

Every blue is black and no red is black, so no blue is red: 1 follows. Nothing links red with pink (only blue is kept apart from pink), so 2 does not follow.

Q.6 · Answer (A) Plough

The pairs are a worker and a tool for working the soil: a harrow breaks up and levels it, and the farmer's plough turns it over. Water, seed and land are not tools.

Q.7 · Answer (A) H is the son of D.

B is D's husband, D is F's sister, F is H's mother, H is J's brother and J is S's sister. H is the son of F, D's sister, so H is D's nephew, not son; the other three statements hold.

Q.8 · Answer (B) PKNL

The first letters move 4 back (X, T, P, L, H), the second 3 forward (E, H, K, N, Q), the third 2 back (R, P, N, L, J) and the fourth 1 forward (J, K, L, M, N): PKNL.

Q.10 · Answer (B) 6, 12

After interchanging 6 and 12: 15 ÷ 5 × 6 + 12 = 18 + 12 = 30, which equals 65 − 35.

Q.12 · Answer (A) pa

'Fast' is in the first two messages and 'da' is the only code common to both; 'track' is in the first and third, where 'le' is common. The remaining word of the first message, 'him', is 'pa'.

Q.14 · Answer (B) 81

Each second number is the square of 5 more than the first: $(1 + 5)^2 = 36$ and $(2 + 5)^2 = 49$. So $(4 + 5)^2 = 81$.

Q.15 · Answer (C) 86

The differences are −5, −4, −3, −2: 89 − 3 = 86, and 86 − 2 = 84.

Q.16 · Answer (B) 2,1,3,4,5

In dictionary order: trace (2), track (1), trade (3), treasure (4), triangle (5). 'Trace' comes before 'track' (e before k), 'trac' before 'trad', and 'tra' before 'tre' and 'tri'.

Q.17 · Answer (A) Charu

Kirti, at a corner, is three seats from Shubh, so Shubh sits at the middle of a side; Pari sits at a middle and Kanak two seats from her, so Kanak does too. Suman sits at a corner with Charu beside her, so Charu is at the middle of a side, leaving the corners to Kirti, Suman, Shlok (opposite Suman) and Shivi.

Q.18 · Answer (C) 82
